

-
- 1 Log into your WebSMS account**
After [sign up](#) can access your account by entering your username (registration email) and password in <https://www.labsmobile.com/en/login>.
 - 2 Request your welcome pack**
To get test credits, first enter your [Invoicing details](#). It is important to enter all your information correctly so our team can validate your account.
 - 3 Check that you have credit**
Before sending anything, make sure that you have enough credit next to the Messages tab on the main menu. If you don't have enough credit, you can [Buy credits](#) by credit card or bank transfer.
 - 4 Access the sending form**
Click on [SEND SMS - Basic send](#) available options, as well as the help icons for each field.
 - 5 Recipient telephone numbers**
Enter the telephone numbers of the recipients, one per line. The numbers should include the country dialing code and contain only digits (without symbols such as + and parenthesis etc.).
 - 6 Message and sender**
The next step is to modify the sender (maximum 11 characters) and compose the text of the message. Remember that the maximum length of a standard SMS is 160 characters, and it can contain links.
 - 7 Schedule the messages**
The last field allows you to select the day and time you want to send the messages. If you leave this field blank, the messages will sent immediately.
 - 8 Confirm and send**
Lastly, click the Send button. Confirm after checking the summary of all the details of the sending operation (numbers, message, recipients, day/time etc.).
 - 9 Results and sending status**
You can consult and export data on sent messages and their statuses (sent, processed, delivered or error) under the [Monitoring](#) and [Statistics](#) tab.
-
